

Nature-based solutions improving water quality

for healthy and resilient water systems

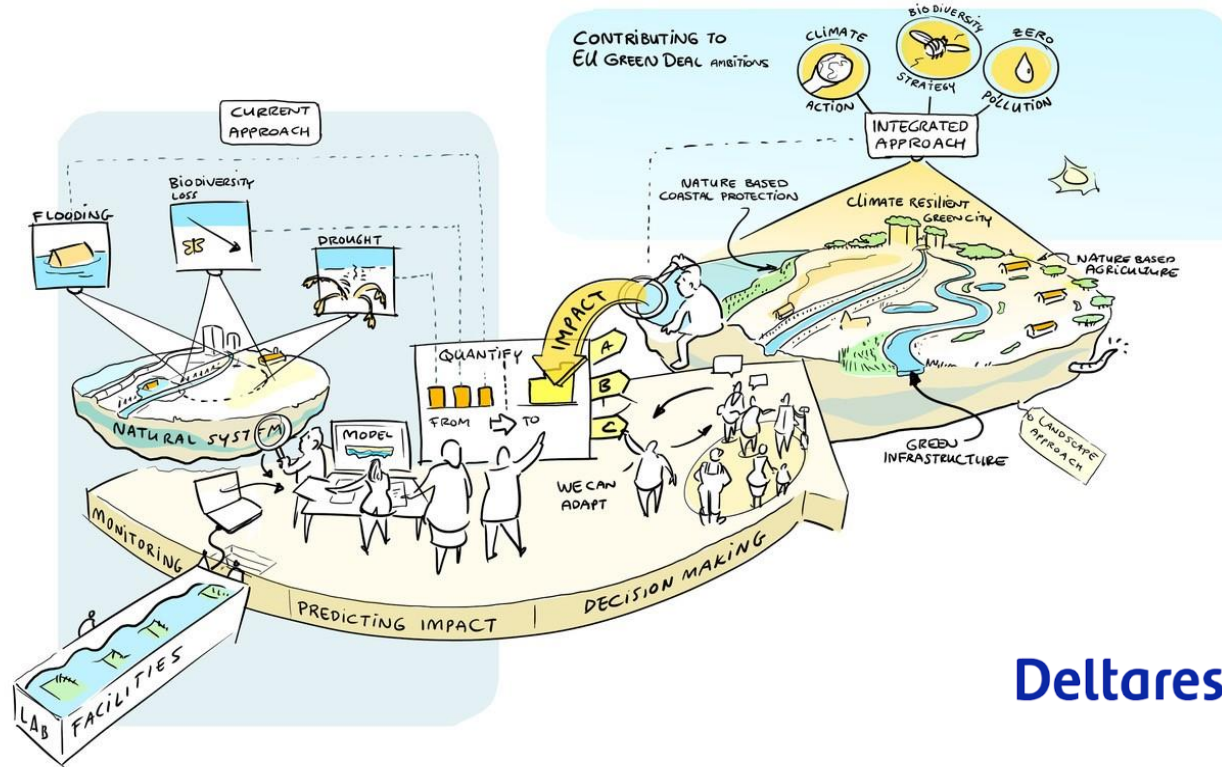

for people and nature

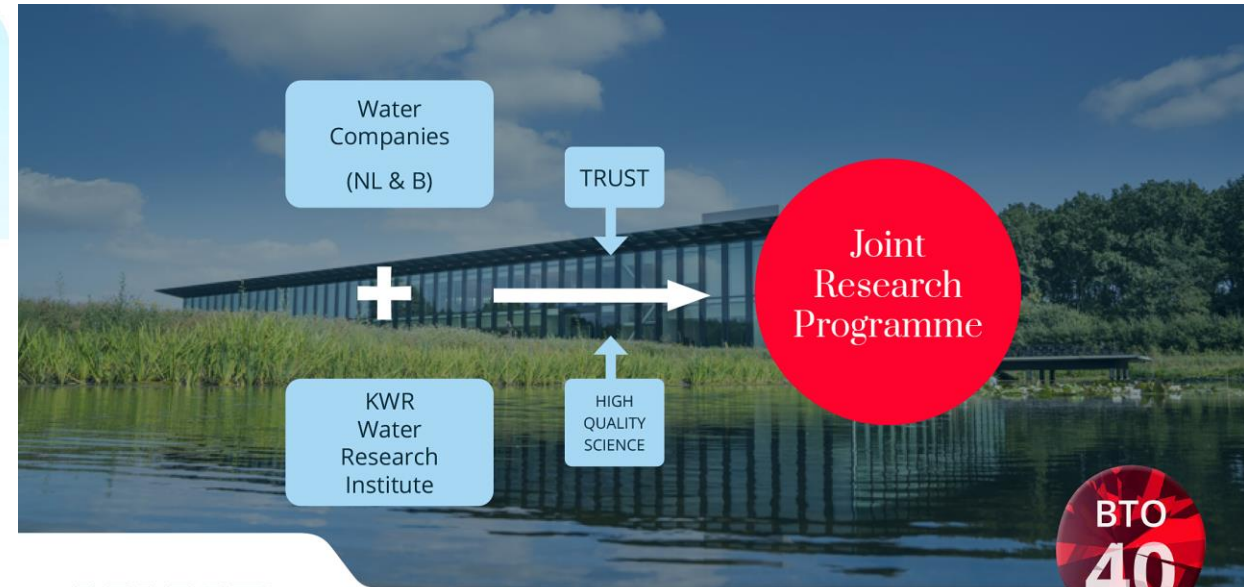

Workshop 8 November 2023

Nature-based solutions improving water quality

for healthy and resilient water systems
for people and nature

Deltares

KWR

Bridging Science to Practice

Program

Chairs: **Hilde Passier** (Deltares); **Inge van Driezum** (KWR)

Improving water quality

Presentations

Ainhoa Gaudes Saez (Leitat, Spain)

Nature-based Solutions: source or sink for alternative water sources in a context of climate change

Jan Staes (Universiteit Antwerpen, Belgium)

Nature-based solutions for protecting and restoring water resources

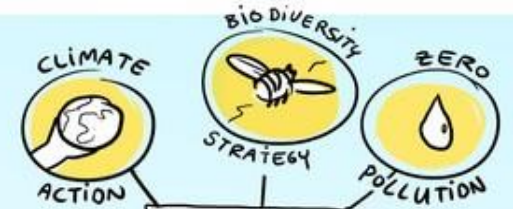

Interactive session *designing nature-based solutions to improve water quality*

Stefano Gamberoni (Deltares): *The setting: Integrated approach for Nature-Based Solutions in the soil and water system*

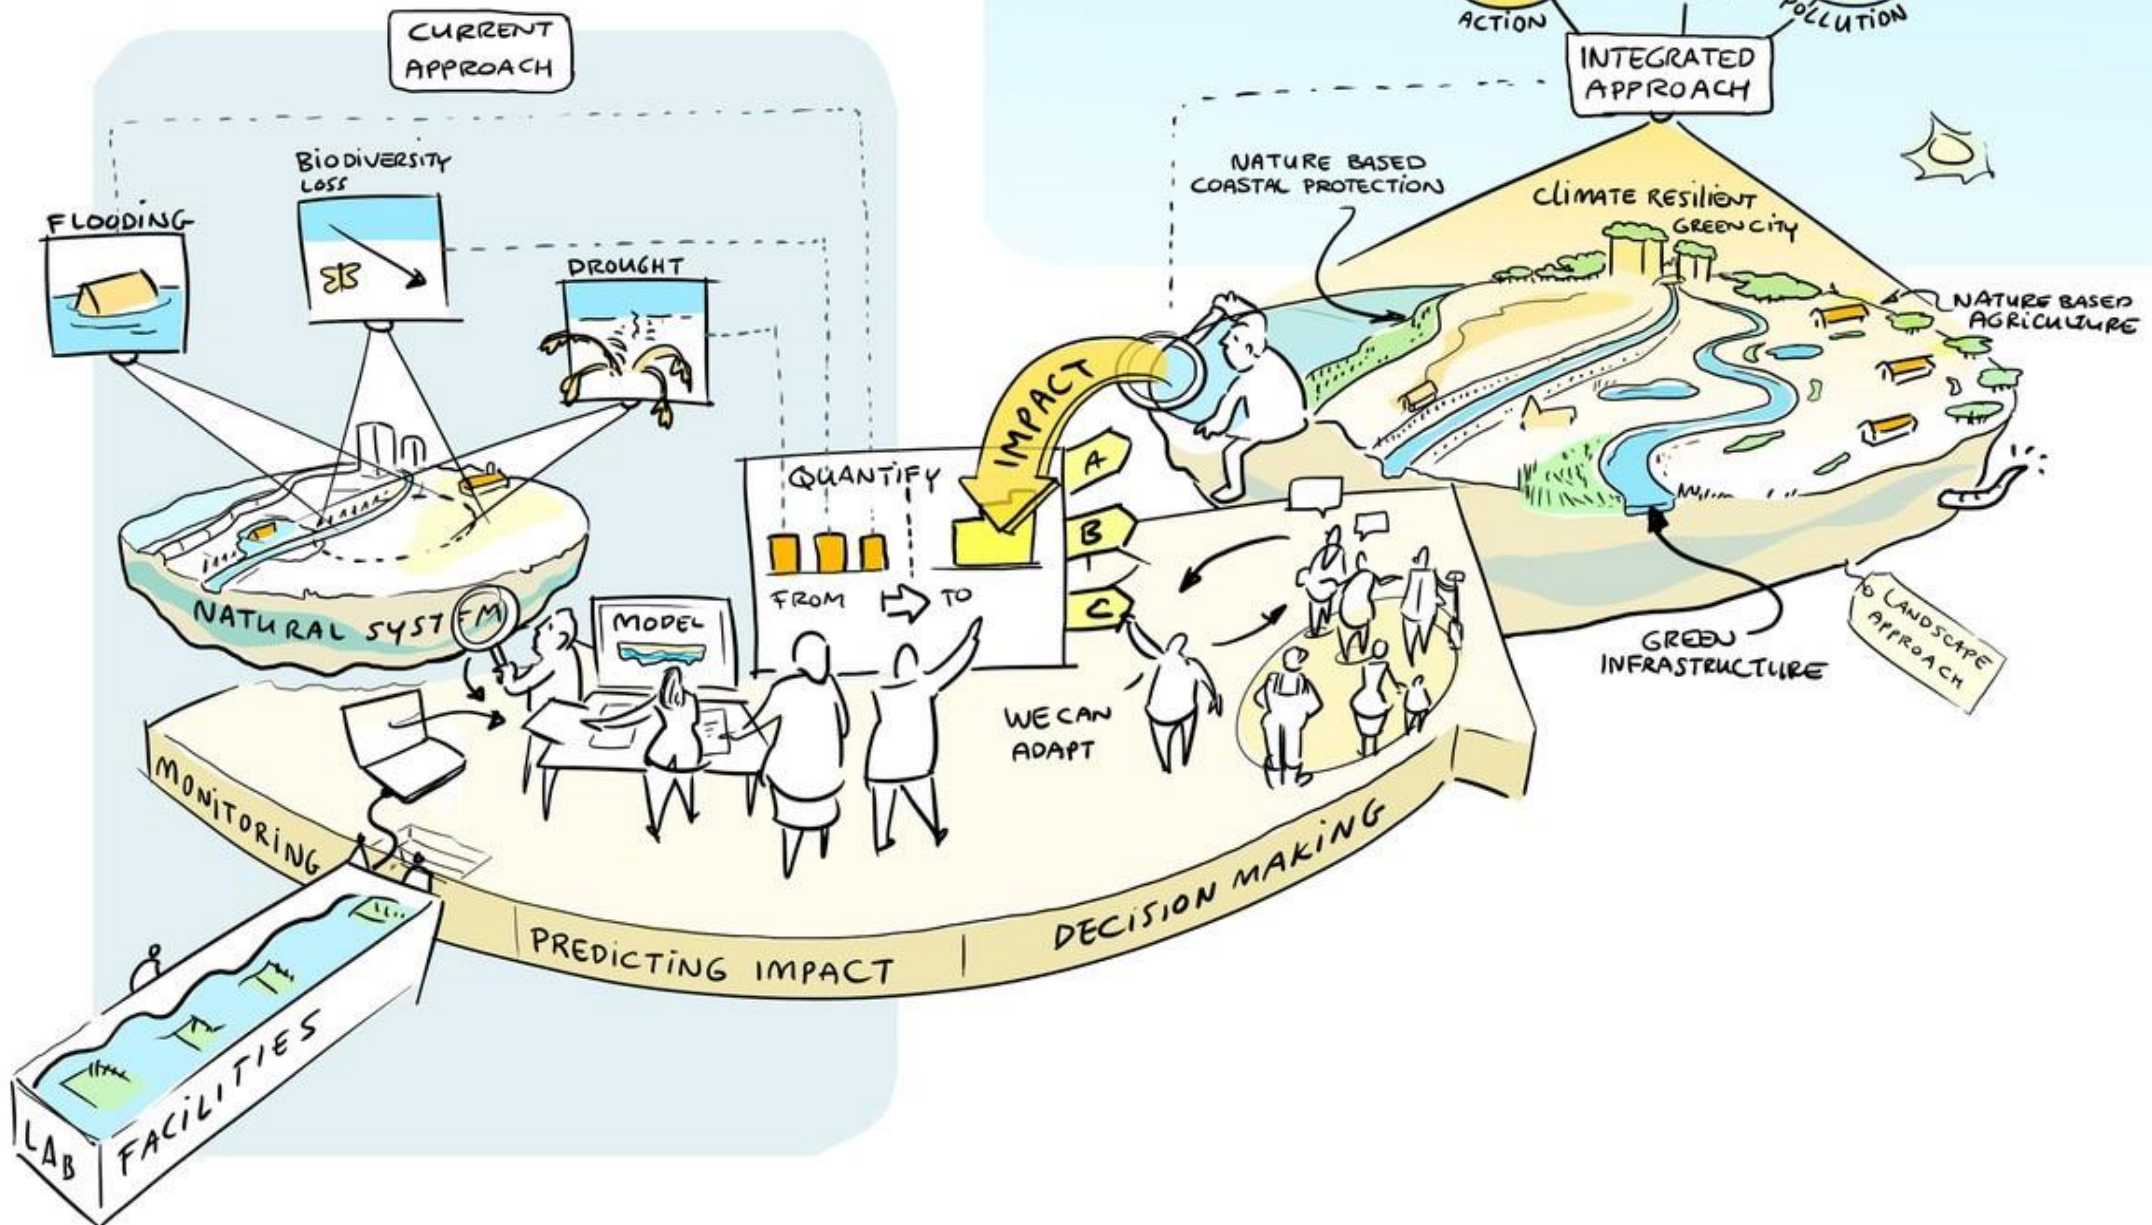

Joachim Rozemeijer (Deltares): *Nutrient capture in reactive barriers in soil and buffer zones in the Netherlands*

Nanne Hoekstra (Deltares): *Reducing diffuse groundwater pollution via extensive methods inspired by remediation of historical pollution*
